New European Innovation Agenda (NEIA)

Deep Tech refers to organizations and startups that aim to solve big societal problems using advanced technologies like **artificial intelligence and quantum computing**. These ventures face significant technical challenges and require substantial research and investment before their solutions can be widely used. Unlike typical startups, **their main risk is in the technical aspects**, while the market risk is lower because their solutions are clearly valuable for society. The scientific problems they work on lead to valuable intellectual property that is hard to replicate. Whether it's in sustainable energy or healthcare, the **applications of deep tech play a crucial role in addressing global challenges**, bringing together different fields to create innovative solutions for a better world.

Part of NEIA and Erasmus+

- The Alliances for Innovation are one of the 25 actions of the New European Innovation Agenda (NEIA)
- They are financed by the Erasmus+ 2021-2027 programme under the section KA2 Partnerships for Innovation
- In Erasmus+ there are two lots: Lot 1 Alliances for Education and Enterprises and Lot 2 Alliances for Sectoral Cooperation on Skills

Lot 1 Alliances for Education and Enterprises – Objectives

GOALS

(Cross)sectoral activities

Talent development: resilience, green and deep tech skills

Innovative and multidisciplinary approaches to teaching and learning

Improving quality and relevance of skills

Setting up incubators

Fostering Corporate Social Responsibility

Expected impact

HE and VET
cooperation with
business

Strengthen regional
ecosystems.
